# KEY FEATURES

---

## Dual-Function Design

- Two tools in one — extraction device that also functions as a stretcher

## Vehicle Loading & Transport

- PowerStand™ enables easy vehicle loading
- Tips back to load into any vehicle
- Load remains at ground level or bed height for smooth transfer
- Handles tight turns effortlessly — turns on a dime

## Capacity & Build

- Supports up to 375 lbs.
- Lightweight at only 65 lbs.
- Ergonomically designed to reduce back strain
- Accommodates individuals up to 6 ft in shoulder height
- Dimensions: 18" × 69"

## Controls & Operation

- Four color-coded buttons for intuitive use:
  - 2 for stair ascent/descent
  - 2 for raising/lowering

## BodyGlide™ Compatibility & Securement

- BodyGlide™ board slots secure remains fully over or inside the body pouch
- Multiple strap points accommodate any body size or stage of decomposition
- Straps secure head, chest, abdomen, thigh, and calf

## Power System

- Rechargeable battery with charger
- Optional accessories: extra battery and vehicle charger

BodyGlide™ board - several strap locations  
INCLUDED

Several user friendly color-coded  
button locations

12v Battery - INCLUDED

Charger - INCLUDED

ACTUATOR

PowerStand™ for load  
support - INCLUDED

Body pouch featuring full length  
side handles - UPGRADE

Power, speed, raise & lower switches

Secondary wheels do all  
the lifting and lowering

## NEW: Electric Actuator for Effortless Lifting

The Stepper Sport® now features a powerful electric actuator that lifts and lowers remains from a horizontal to vertical position at the touch of a button. No more awkward bending, twisting, or manual strain—just smooth, effortless motion.

### Benefits include:

- Eliminates manual lifting, protecting attendants from injury
- Keeps attendants upright and ergonomic, reducing fatigue over multiple removals
- Prevents back, shoulder, and neck strain caused by traditional handling
- Smooth, controlled movement of remains, minimizing risk and maintaining dignity

With the electric actuator, lifting is no longer lifting—it's a simple button press, giving funeral professionals the confidence and safety they deserve.

## Stretcher Functionality – and Beyond

The Stepper Sport® converts similarly to a stretcher and can be tipped back and loaded into a vehicle just like a cot. It becomes your “second attendant,” helping you climb or descend stairs without risk of injury.

### Benefits include:

- Electrically climbs and descends stairs with precision
- Uni-Directional prop stand wheels make maneuvering corners and tight hallways effortless
- Electrically raises and lowers remains to the correct position for transfer
- Sturdy microcellular wheels glide on any surface and never need inflating
- Folding handle keeps attendants upright while descending

## Seamless Transfers, Industry-Standard Design

When collapsed, The Stepper Sport® is the same height as a collapsed removal cot, making transfers fast and controlled.

For bed removals, the optional Load Assist Stand drops down to raise the Stepper to bed height, allowing straight, lateral transfers directly from the bed onto The Stepper—no lifting, no tilting, no strain.

Simply place the Stepper Sport® next to your cot or bedside, slide the remains across using a BodyGlide board, and you're ready to move. In the vehicle, it can either slide neatly beside your cot or lock securely into place.

## The Answer to Home Removal Challenges

Funeral professionals are being asked to do more with less: less staff, less time, and less revenue. With rising body weights, more home deaths from hospice care, and tighter budgets, the burden often falls on your body.

### The Stepper Sport® changes that reality:

- No hallway is too narrow
- No room too cluttered
- No stairway too steep or curved
- No basement too difficult

The combination of electric actuator lifting and stair-climbing capability makes removals effortless, safe, and accessible for professionals of any size, height, or gender.

## Built to Last — Because You Can't Be Left to Struggle

At Mortuary Lift Company, we understand that your work is unpredictable. That's why we design and manufacture only rugged, durable, long-lasting equipment. The Stepper Sport® is light enough to take on every call, yet strong enough to do the job every time. Once you try it, you'll wonder how you ever managed without it.
